

Content Customization

Turnkey solutions for creating company-specific curriculum.

For many organizations, delivering company-specific knowledge is a crucial factor in training. Tooling U-SME provides three levels of customization options, making it simple to seamlessly integrate your own custom content into your program. The result? Tooling U-SME's proven, industry-vetted manufacturing foundation, tailored to your workplace and your workforce.

1. Add your custom images, text and videos to the course.

Work with a range of user-friendly authoring tools and templates to add your company-specific content to pre-existing classes. Tie foundational Tooling U-SME knowledge to your specific processes or product features.

2. Upload your own content in the course format.

Use the Tooling U-SME formatting guide and template to convert and author your pre-existing content for web-based delivery: images, PowerPoint presentations, video, tests and text. Your online content fits seamlessly in our system.

3. Partner with our content staff for custom development.

Gain access to our own content development resources to transform your expertise into web-based training of the highest quality.
