

# INSTRUCTOR-LED TRAINING

## Expert Training. Extraordinary Results.

Tooling U-SME offers an extensive catalog of competency-based classes that provide the advanced manufacturing knowledge needed by employers today. But our catalog is just the starting point. We're able to customize classes to meet your company's business needs – from production to engineering, frontline leadership to management, and more. Through our extensive network of instructors, we can deliver training on hard-to-find or very specific topics outside of our catalog.

With more than 80 years of manufacturing expertise and with the thousands of companies we work with annually, Tooling U-SME has built up a network of top-tier manufacturing educators and trainers. Our instructors bring a depth of industry knowledge and experience as well as a passion for what they teach.

### Face-to-Face Training Brought to Your Facility

Tooling U-SME instructors provide a dynamic, engaging classroom experience that may be extended out into the work environment. Training is highly interactive, hands-on, and personalized to your business needs.

- ◆ Immediately applicable
- ◆ Hands-on experiences
