

TOOLING U-SME CONTENT INTEGRATION

Learning Management System Integration

Our cloud-based solution integrates seamlessly with your own system.

Tooling U-SME classes have been tested on and are currently running on all of the most popular Learning Management Systems. Integrating them into virtually any SCORM/AICC platform – the most preferred types – is simple, trouble-free, and seamless to the user.

Benefits of LMS Integration

Content and LMS Integration

When using AICC or SCORM, the content features include Class Launching, Bookmarks, Exam Score, Class Completion, Debugging, and Logging of Activity.

Automatic updating and maintenance of classes

Because all class content is cloud-based, Tooling U-SME continually updates it without any assistance required from your staff. Students always have the most current information available.

Implementation service and support

Our experienced technical staff works with your team on integration, including setup, beta testing, and troubleshooting.

Third-Party LMS

We can provide our content to any third-party LMS that supports SCORM or AICC.

- ◆ SCORM versions supported: 1.1, 1.2 and 2004
- ◆ AICC versions supported: 2.2 and 3.0

Our experienced technical staff works with your team on integration, including setup, beta testing and troubleshooting.

Tooling U-SME is a leader in manufacturing workforce learning and development.
