

WHY TOOLING U-SME

We know your industry. We know education.

Progress occurs when you invest in technology and people. By expanding the capabilities of today's and tomorrow's workforce, we can help build your business, drive meaningful economic growth, and change lives with unique and scalable training and development programs.

For almost 20 years, Tooling U-SME has been developing online manufacturing training classes used by thousands of organizations, including more than half of the Fortune 500® manufacturing companies and hundreds of educational institutions. Backed by over 80 years of hands-on manufacturing experience, we are dedicated to helping build the next generation workforce.

Scalable training. Measureable results.

Our training solutions begin with your performance outcomes. We partner with you to analyze needs, design competency-based training, streamline implementation, and measure results. Our Competency Framework revolutionizes training by breaking successful performance into a specific set of related knowledge, skills, and abilities, helping to identify gaps and define requirements.

Our training programs, calibrated to real business needs, will:

- ◆ Develop mission critical skills
- ◆ Expedite onboarding and define skills development
- ◆ Capture and standardize "tribal knowledge"
- ◆ Ensure operational excellence/world class manufacturing
- ◆ Minimize the skills gap
- ◆ Drive continuous improvement and compliance
- ◆ Improve quality and reduce scrap
- ◆ Leverage new technologies and drive innovation
- ◆ Cross train and increase workforce flexibility
- ◆ Boost operational effectiveness and productivity
- ◆ Reduce risk and exposure
- ◆ Improve safety

We will assess your current state of learning and development and customize a program entirely for your organization. Or we can supplement your existing program with any combination of our online courses, instructor-led training, and other resources such as books, videos, and certifications.

Every step is guided by knowledgeable sales, service, and client support staff. We can help you manage, measure, and drive success.

Tooling U-SME is a leader in manufacturing workforce education and development.
